

Responsive Behaviours Master Class: Leading your team to improving outcomes for people living with dementia

Presented by:

Professor Elizabeth Beattie (pictured top left)
Director, Dementia Training Australia & Dementia Centre for Research
Collaboration (DCRC)
Professor in Nursing, Queensland University of Technology

Dr Margaret MacAndrew (pictured top right)
Research Fellow, DCRC
Lecturer, School of Nursing, QLD University of Technology

Workshop Overview:

This workshop will be useful to experienced RACF senior clinicians who are responsible for leading their staff in improving care of people living with dementia, specifically those experiencing responsive behaviours. It is focused on helping clinicians:

- Identify issues that may be contributing to the provision of less than optimal resident care.
- Establish effective, sustainable systems to build staff capacity to recognise, assess, monitor, resolve or reduce issues that create and magnify resident discomfort
- Promote resident dignity and comfort and increase staff and family satisfaction.

The workshop assumes core knowledge of the principles of person-centred care and responsive behaviours.

Program:

Please refer to page two of this flyer for the workshop program.

Event Details

Cost: Funded by the Australian Government

Refreshments: Morning tea and lunch provided

Date: Wednesday 22 May 2019

Time: 9:00am to 1:30pm (sign-in from 8:30am)
