

## Veterans and dementia

Presented by:  
**Louise Jones**, BappSc OT, Dementia Wellbeing Consultant

This two-hour workshop aims to raise awareness about veterans with dementia in Australia and their use of services.

### Workshop objectives:

Participants will have an increased awareness of:

- The latest research on PTSD and dementia
- The impact of being a veteran on mood disorders in later life
- The role of alcohol for some veterans in managing mental health issues and the consequences
- Some of the latest research on traumatic brain injury and dementia
- Barriers and enablers to quality care
- Assessment tools and strategies
- Where to go for further information/training (national and state-based).

This is one of three workshop sessions in the Dementia in Diverse Groups Symposium. Each workshop focuses on the unique needs of individual groups of people living with dementia.
