

Brisbane guest lecture with live broadcast to QLD videoconference sites

Acute Management of Responsive Behaviours in the Hospital Setting

Exploring clinically appropriate integration of non-pharmacological and pharmacological interventions through a series of case studies

Presented by:

Frederick Graham (pictured top right)
(BN, PhD Candidate) - Clinical Nurse Consultant Dementia & Delirium
Princess Alexandra Hospital

Duncan Long (pictured middle)
(B Pharm, Grad Cert Clin Pharm, BPS Geriatric Medicine)
Senior Pharmacist, Geriatric Medicine, Princess Alexandra Hospital

Dr Lisa Kelly (pictured top left)
Staff Specialist Geriatrician, Princess Alexandra Hospital,
Conjoint Senior Lecturer University of Queensland

Overview:

Developing comprehensive individualised care plans for people living with dementia who are experiencing responsive behaviours in hospital settings is often complex and requires careful management of a range of clinical, psychosocial and environmental factors.

An inter-professional team of specialists in gerontology (geriatrician, pharmacist and nurse) uses a series of case studies to explore different complex patient presentations and the development of effective individualised care plans. The clinical complexity of individual presentations to hospital is outlined, alongside theoretical frameworks underpinning care and medication safety.

To register for videoconference sites:

If you wish to attend one of DTA's registered videoconference sites in Queensland, please contact the person listed for the venue you would like to attend on the second page of this flyer.

Event Details

Cost: Funded by the Australian Government

Date: Tuesday 14th May
